Completion: Retaining and Graduating Males of Color in One Year

September 20, 2017

Teleconference	Time	Registration Due Date
Webinar	1-2:30 pm	September 15, 2017

Workshop Overview:

A significant percentage of male students of color face substantial challenges when entering college. In order to increase the success and persistence of this student population, institutions need to develop and grow strong recruitment and on-campus programs that will give them the support they need to achieve their full potential.

This webinar will highlight the importance of collaborative partnerships between academic and student affairs with designing and implementing learning communities. The presenter will review the different definitions of learning communities at JV Educational Consultants and at other various higher education institutions, as well as explain why collaborative partnerships are essential for their development. The presenter will also describe a successful learning community called QUEST. QUEST is a structured learning community consisting of students taking two or more prescribed classes together and benefiting from active learning via academic coaching, mentoring, and collaborating with faculty in activities inside and outside the classroom. Participants will realize that to maximize the impact on student success for minority males; it is imperative that student affairs departments closely link their efforts with the institutional mission and strategic plan to ensure that the outcome of graduation is achievable.

Intrusive Academic Advising: The Tool to Use to Increase Student Success

November 17, 2017

Teleconference	Time	Registration Due Date
Webinar	1-2:30 pm	November 10, 2017

Workshop Overview:

Intrusive advising means that higher educational institutions will link instructional faculty, academic advisors, counselors and others will take the initiative to reach out to students to offer advice, support and assistance, rather than waiting for students to seek help. Hence, intrusive academic advising expects that advisors will schedule meetings with their advisees at critical junctures, especially during the first-year of enrollment, following receipt of notifications of academic difficulty, planning academic programs, changing majors, etc. Intrusive advising does not mean “hand holding.” Certainly, it suggests that faculty, counselors, academic advisors and others are generally concerned for students’ academic progress as well as assist students to understand and utilize programs and services that can increase their success. Intrusive advising programs and advisors understand that many students, especially those who may be at greater risk for dropping out, often do not seek assistance in time for the assistance to have a positive impact on their progress.

Objectives:

- ✓ Create learning advising templates for student success
- ✓ Define Advising
- ✓ Document follow-up during advising
- ✓ Understand how to use engagement when advising students
- ✓ Identify first year students

Who should attend and participate?

- ✓ Academic Affairs/Admission Staff Leaders
